Are you ready for the looming MDS changes?

The Centers for Medicare & Medicaid Services is about to release new rules and items for the Minimum Data Set 3.0. During this informative webinar, you will be privy to what's around the corner — and what you should be doing now to be ready for the Oct. 1 changes.

Residents' rights vs. the new requirements

Facilities want to ensure regulatory compliance. Residents want the right to make personal choices. The obligation to protect and enrich resident care, health, and safety often conflicts with a resident's personal preferences. Resident rights provisions and changes in the new requirements for participation will be discussed.

The role of clinical technology in meeting Mega-Rule requirements

With the Nov. 28 Mega-Rule deadline fast approaching, providers are working hard to finish facility assessments, QAPI plans, antibiotic stewardship programs, staff assessments — and more. This session will examine various ways technology tools can help ensure compliance success.
